

Ludmilla Diniz

MEG 2

From: Brazil

Currently living in: Panama City, Panama

Life After MEG:

Ludmilla currently works at UNDP as Regional Technical Specialist for Climate Change Mitigation and Energy in the Panama Regional Hub. She is responsible for providing technical, policy, and programming implementation support and oversight to UNDP country offices. Her responsibilities cover the Energy, Infrastructure, Transport and Technology (EITT) activities of UNDP in Latin America and the Caribbean region. She oversees the GEF (Global Environment Facility) and Green Climate fund (GCF) programming.

Before moving to Panama, she was based in UNDP Brazil as technical coordinator of the GEF Project “Market Transformation for Energy Efficiency in Buildings” implemented with the Ministry of Environment of Brazil, Inter-American Development Bank (IDB) and the Montreal Protocol.

Since she left MEG 10 years ago, she has been focusing on international cooperation and energy. She worked for four years with GIZ in Rio de Janeiro, managing strategic projects in the Renewable Energy and Energy Efficiency Program in Brazil. She liaised with national development and regional banks on ways to support energy efficiency and climate financing.

To get inspired and motivated, she does percussion lessons and yoga. She is really taking advantage of being very close to the Pacific and Atlantic Oceans and diving a lot. She hopes to become a divemaster very soon!

She holds a Bachelor’s degree in International Relations from the Catholic University of Goiás (Brazil) and speaks Spanish, Portuguese, German and English.
